

Clark Forklift Part

Clark Forklift Part - Currently, there are over 350,000 Clark lift trucks performing worldwide, and upwards of 250,000 in service in North America alone. With five main lines across the world, Clark is proud to be one of the most expansive corporations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand powered lift trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, handles more than 120,000 specific parts designed for 20 exclusive designs of forklifts and automated equipment. Your local Clark Dealer is your complete source for availability of all your parts requirements offered by Clark Totalift.

Clark's phenomenal Parts Distribution Facilities are conveniently stationed in Louisville, Kentucky, which serves both their consumers and sellers in North America, and Changwon, South Korea, which handles their Asian sellers and consumers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing companies. Driven to offer the highest level of value and service to our users, Clark remains on the cutting edge when it comes to improving productivity and benefiting performance.

Clark Totalift has a really impressive intercontinental support network. With over 550 locations worldwide, dealer representation in over 80 countries and 230 locations in North America, their high level of commitment to their customers predominates the material handling industry.

By pioneering the operator restraint system safety feature, Clark proudly remains a leader of innovation in the industrial equipment and automated forklift industry. This exceptional commitment to safety is now a standard feature on every lift truck.

Clark has a unyielding objective to have the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be globally certified with quality standard ISO 9001 in all of its production facilities. Furthermore, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be ready for any number of environmental restrictions, thus placing them in a dominant industry position.

Clark has chosen the system of "Lean Production" at all of its assembly facilities for the reason that this technique is extremely economical and allows for minimal use of resources. Developed to ensure maximum efficiency, this system is designed to discover and acknowledge the most efficient ways for production plant stewardship. Clark has concluded this transition of its Korean plant. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

By working together, Clark's product suppliers and engineers communicate towards improving product proficiency while minimizing costs. The contemporary value engineering program combines innovative product improvement and offers improved client support and service within the industry.
